

IOGCC INTERNATIONAL COMMITTEE

About The Committee

Since 1935, the Interstate Oil and Gas Compact Commission has assisted member states of the U.S. in maximizing oil and natural gas production, minimizing waste, and protecting human and environmental health through sound regulatory practices. This more-than-60-year track record of collective experience is now available to international affiliates.

At its 1995 Midyear Meeting, the IOGCC voted to establish affiliate relationships with international oil and gas producing countries. Through IOGCC International, international affiliates have full access to information and resources of the Interstate Oil and Gas Compact Commission, as well as the opportunity to participate on IOGCC committees and activities, share experiences and information, together improve our knowledge and solve common problems, and study common issues facing every nation's hydrocarbon recovery efforts.

IOGCC international affiliates are:

- Alberta, Canada (1996)
- Venezuela (1997)
- Nova Scotia, Canada (1997)
- Newfoundland & Labrador, Canada (1997)
- Egypt (1999)
- Georgia (2001)
- British Columbia, Canada (2002)
- Yukon, Canada (2008)
- Saskatchewan, Canada (2008)

International Affiliate Activities

Because of its unique structure, IOGCC International offers a highly effective forum for international governments, states, industry, environmentalists and others to share information and viewpoints. Issues of interest include:

- Conservation and efficient recovery of hydrocarbons.
- Proactive dealings with emerging environmental and health issues.

IOGCC International provides international affiliates with an important communication link with oil and gas regulators of the United States. This communication is achieved during meetings and committee activities. The IOGCC publishes books and materials focusing on regulatory programs, technology, exploration and production issues and other topics.

Most importantly, IOGCC International is engaged in direct programs with international affiliates to foster the exchange of knowledge and technology transfer.

Strategies for the Future

The IOGCC is ever evolving to meet changing needs, with programs and services developed around emerging issues.

In coming years, conserving nonrenewable energy sources and protecting environmental and human health will become top priorities around the globe. Energy sources and protecting the environment and human health is a top priority around the globe. The Interstate Oil and Gas Compact Commission and IOGCC International will provide a forum for voices of reason, balance and wisdom in developing the energy resources of the world.
