FracFocus
Chemical Disclosure Registry

BENEFITS

Participation Matters

The Facts

As a FracFocus 2.0 participating company and a supporter, you may ask yourself, how does our involvement benefit the company?

Here are a few things to think about:

- FracFocus 2.0 serves as an industry vehicle to facilitate transparency of hydraulic fracturing information and chemical data to the public.
- The site provides reporting consistency for multi-state operations.
- As the world's only source of hydraulic fracturing chemical data all in one place, FracFocus2.0 sets an international standard for chemical disclosure.
- FracFocus2.0 is an independent partnership consisting of the Interstate Oil and Gas Compact Commission and Ground Water Protection Council, two organizations whose missions revolve around conservation and environmental protection. This gives participating companies important third-party credibility.
- The objective and respected site promotes public education of hydraulic fracturing and the regulatory process.
- As a participating company, your company stands out as an industry leader.

Getting Started

To sign up as a participating company, you must first register your company at www.fracfocusdata.org. There you can download the User Guide with step by step directions to create and validate your account, manage users, and begin uploading well data. Webinar training is also available.

Please direct questions to Mike Nickolaus, PG, FracFocus partner, at MNickolaus@FracFocus.org.

Spread the Word

Make an impact by promoting your support of FracFocus 2.0. Here are some ideas:

Post a link to the FracFocus Web site on your company site. *Download our FracFocus Seal of Support.*

Discuss your participation with other industry leaders/executives.

Publish an article about your involvement in your employee newsletter or company intranet.

Create a news release highlighting your involvement and how FracFocus benefits the public.

Talk about FracFocus on company social media pages.
