FracFocus 2.0: The Facts

State governments may ask how their support of FracFocus 2.0 provides a benefit to them and the public.

Here are a few things to think about:

-  FracFocus has upgraded its technology! FracFocus 2.0 now allows for more effective searches by location, date, chemical or Chemical Abstract Service (CAS) names.
-  FracFocus 2.0 provides transparency by answering questions about specific chemicals used in the hydraulic fracturing process and gives government officials an informational resource to pass on to the public.
-  The site provides reporting consistency for multi-state operations.
-  As the world's only source of hydraulic fracturing chemical data all in one place, FracFocus 2.0 sets an international standard for chemical disclosure.
-  FracFocus 2.0 is an independent partnership consisting of the Interstate Oil and Gas Compact Commission and Ground Water Protection Council, two organizations representing state governments. This gives important third-party credibility.
-  The objective and respected site promotes public education of hydraulic fracturing and the regulatory process.
-  FracFocus 2.0 allows states and their regulators to use data to generate reports and also sends notifications to state users regarding data.
-  The site provides direct links to state-by-state hydraulic fracturing regulations allowing users to find the information they need all in one place.
-  At a time when every dollar counts, FracFocus 2.0 saves state and federal tax dollars and prevents each state from having to develop their own reporting system.
